

# Nationwide Franking Sense

# NFS 650

The NFS 650 is tailored to the high volume sector and offers the most comprehensive list of features. This robust machine is the flagship of the range and equally at home in a busy office or direct mail environment.

## High quality inkjet franking

### **SPEEDS UP TO 8100 ENVELOPES AN HOUR**

The high speed of the NFS 650 enables you to cope with heavy volumes of mail. That makes it ideal for central mail processing. It also means no problem when large amounts of mail have to be franked late in the afternoon for same-day despatch.

The NFS 650 can handle envelopes as big as C4, including portrait position.

### **LABOUR-SAVING AUTOMATIC FACILITIES**

The NFS 650 has the option of an *automatic feeder* which can handle envelopes and flat packets up to 16mm thick. This is fitted with a *sealer*, enabling use of gummed envelopes instead of press-seal.

An automatic *label dispenser* with a big 70-label capacity produces self-adhesive franked strips for posting large parcels.

### **LINK TO A RANGE OF POSTAL SCALES**

NFS 650 can interface with an electronic postal scale which calculates the correct postage according to weight and service selected. The scale can then set NFS 650 automatically to the correct amount. This avoids the risk of error in manually setting the franker. All scales are compliant with Royal Mail's PIP pricing structure. Most Nationwide scales store more than 30 UK and overseas tariffs, including special fee services such as Recorded Delivery and Registered Post.

Simple operation is aided by automatic date change, as well as job memories which enable you to store settings, with instant recall for re-use. That saves time and avoids errors on repeated jobs.

### **RECORDS AND ALLOCATES POSTAGE COSTS**

Integral accounting is available on NFS 650, enabling you to record postage costs for up to 50 charge codes, jobs or departments. This means you can allocate postage costs to cost centres, instead of having to carry them as an overhead.

You can print out postage accounting records onto franking labels, or through an external printer if required.

# ADDED-VALUE MESSAGING OPTIONS

Desktop-printer-style digital inkjet printing enables NFS 650 to provide a wide choice of overprinting facilities that add value to all your post. Software control means that complex messages – both text and graphics – can be easily selected and changed whenever you wish.

## CHOICE OF SLOGANS

The NFS 650 gives you pushbutton choice of up to 8 customised and interchangeable slogans which print alongside the postal frank.

A company logo or slogan can be made up to your own design: these are loaded from a memory card – and you can have as many designs as you like on extra cards.

## MINI-DIE OVERPRINTS

Pre-loaded mini-dies enable you to overprint post with any of 9 flashes such as **FIRST CLASS, URGENT, Good News** and **Too Good to Ignore**.

## VARIABLE TEXT MESSAGES

In addition to slogans and mini-dies, the NFS 650 enables you to add variable text messages. You simply create them on the NFS 650's keyboard – no external input is needed.

You can store up to 9 messages in the memory and select them whenever needed. This enables you to individually tailor messages to specific customers.

## SUPPORT

As the first Royal Mail accredited 3rd party maintainer of franking systems, we can offer nationwide service and support. Our UK based support centre will handle all your service queries.

## NFS 650 SPECIFICATION

<b>Height</b>	250mm
<b>Width</b>	570mm 840mm with Autofeed
