IntelliLink™ enabled

IntelliLink™ Technology

IntelliLink™ revolutionizes the mailing system's ability to communicate. Your mailing system connects via **IntelliLink™** to the world wide web to provide you access to new features as required. With a simple connection to a phone line, **IntelliLink™** will automatically support your operations by downloading updated software to ensure your mail is processed efficiently.

Features include:

- ✓ One touch Postage by Phone refills
- ✓ Postal rate changes downloaded automatically
- ✓ Ability to download new advertising slogans
- ✓ Convenient system software updates
- ✓ Future enhancements without a service visit or equipment change

Automate for a streamlined mailing process

Say goodbye to hand folding, stuffing and sealing envelopes with the Secap range of inserters.

Now you can process all your outgoing mail with ease, eliminating wasted time and unproductive use of personnel allowing you to focus on important work.

- ✓ Easy to operate - ideal for "walk-up use"
- ✓ Get mail out faster
- ✓ Process multi-page mailings

- ✓ Take advantage of postal discounts
- ✓ Capable of integrating with franking machines
- ✓ OMR capable

OfficeRight™ SI1000

The SI1000, automatic desktop folder inserter is designed to prepare your mail hands free and hassle free.

The SI1000 has more advantages than you ever imagined. Your mail will look professional without expensive equipment and resources. Now you can mail more often and reap the benefits of retaining hard-earned customers.

The SI1000 makes it simple by being able to just load the materials, press the button and go! Watch your document become folded and inserted "hands-free."

900 Cycles per hour

Products	Quick Reference Description	
	Feeders	Envelope type
SI1000 1 station	1 sheet	DL
SI1000 2 station	1 insert, 1 sheet	DL
SI1000 3 station	1 insert, 2 sheet	DL

FastPac™ SI3300 and SI3500

The FastPac range of inserters have all the necessary brainwork built in - there's no need for dedicated operators, or lengthy training.

The system can memorize your most frequent mailings, so that each department or user can call up their own choice of program at the touch of a button.

3000 Cycles per hour

Products	Quick Reference Description	
	Feeders	Envelope type
SI3300 1 station	1 sheet	C5 - C6
SI3300 2 station	1 insert, 1 sheet	C5 - C6
SI3300 3 station	1 insert, 2 sheet	C5 - C6

SI3500 3 station	1 insert, 2 sheet	C5 - C6
------------------	-------------------	---------

3500 Cycles per hour

The range brings a new level of productivity to your mail processing operations, by folding and inserting material up to twenty-five times faster than by hand, allowing your staff to concentrate on more productive duties.

You can boost productivity to even higher levels by connecting the SI3500 to a high volume franking machine using the fully integrated mailing machine interface or by using the OptiFlow™ Vertical Power stacker (right).

OL400 Semi Automatic Letter Opener

This letter opener will make short work of opening large volumes of mail. Simply place a pile of envelopes on the feed deck and they will be automatically fed through to the stacker tray, ready to have the contents removed.

At a speed of up to 400 letters per minute, the OL400 will certainly reduce the time spent on the mundane chore of opening letters.
