

Nationwide Franking Sense NFS 250

Inkjet Mailing Printer for Small Businesses

COMPACT, CONVENIENT AND AFFORDABLE

NFS 250

The Postal Solution for Businesses with Low Mailing Volumes

The NFS 250 has been designed for companies that could not benefit until now from the latest developments in the area of mailing solutions or that are still using stamps. The NFS 250 is a revolution in cost-effective convenience for small businesses, in the office or at home.

The post office Services from your Desk

The NFS 250 frank stamps straight on to your envelopes, with the latest inkjet printing technology for a clean impression. It is a compact, standalone and always ready-to-use mailing system. With the NFS 250, you will never be caught without a stamp as its built-in-modem enables a quick recredit from the comfort of your desk. It is ready to be used at all times around the clock.

Easier than Stamps

The NFS 250 accepts envelopes up to 8mm thick and thanks to its remarkable speed, processes the daily mail of most small companies in less than a minute. The electronic scale of the NFS 250 weighs mail pieces up to 2kg and its postal rate calculator offers the main rates and services. The NFS 250 is then automatically set to the correct amount. There is no more need to go through complicated postal charts to find the right tariff. In order to simplify your office life, the NFS 250 memory can even store your two most commonly-used keystrokes sequences, e.g. 30 Pence Value + Happy Christmas Advert + First Class Mail. The NFS 250 definitely saves your precious time and undoubtedly is easier to use than stamps.

The Essential Office Tool

Access to the postage funds or to the modem recrediting procedure are all controlled by the electronics of the machine and enable to easily share the NFS 250 among users of the same organisation.

The NFS 250 not only enables you to process your mail at any time and to frank the exact postage amount, but also gives you your mail a smart professional look. Pre-defined advertising messages and custom made designs are loaded onto a memory card and enable to give a big business image to a small company.

Technology Focus:

- Secure inkjet printhead
- Built-in modem for on-line resetting
- Integrated postal rate calculator and connected electronic scale
